Synthetic Biology

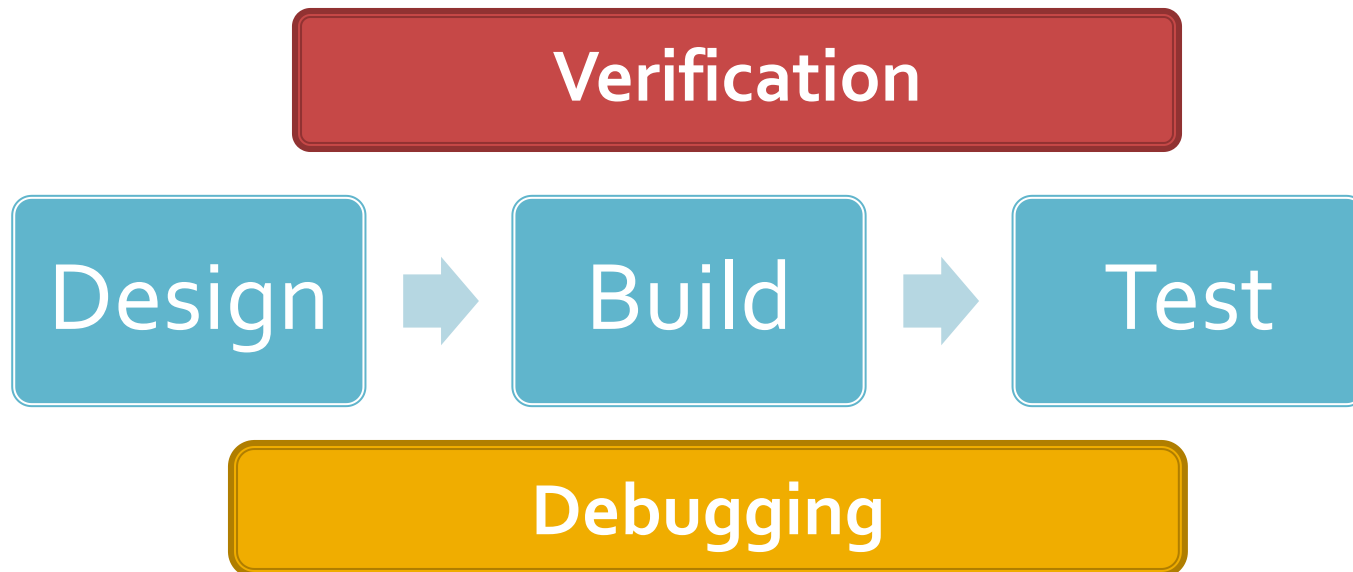

A Circular Definition

- **Synthetic Biology** is the **engineering** arm of systems biology.
- **Systems Biology** is the **scientific** arm of synthetic biology.

Synthetic Biology

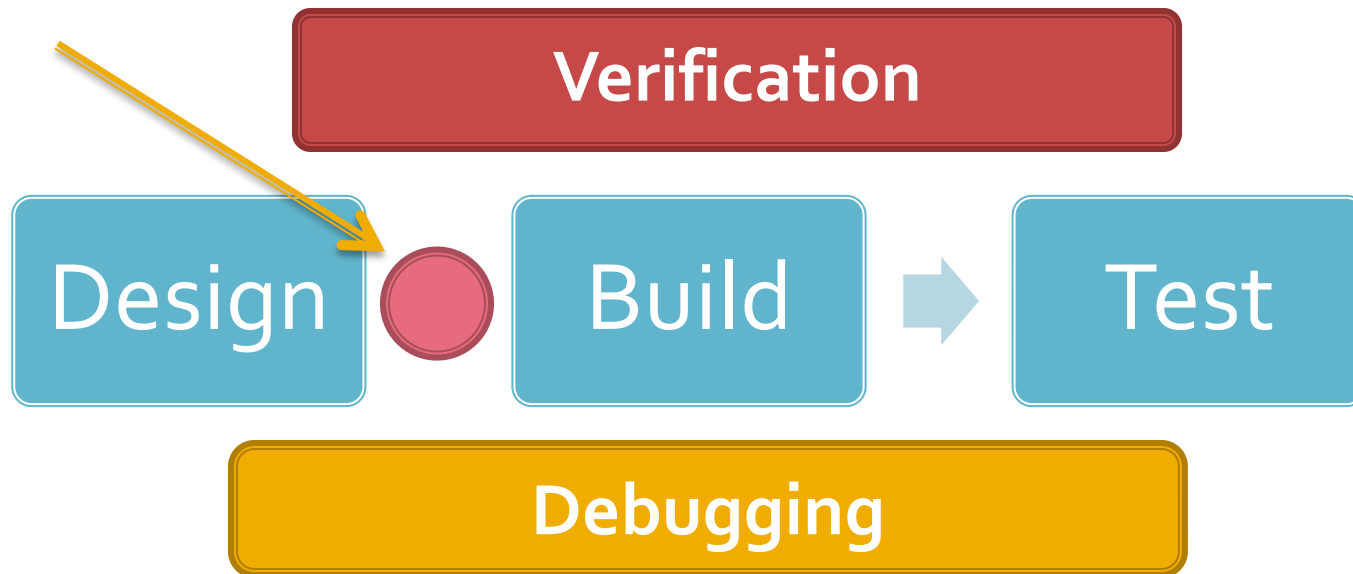

Synthetic Biology

Synthetic Biology

The SBOL group is currently concerned with this

Overview

- Motivation and History
- SBOL 1.1
- SBOL 2.0
- Demo
- Future

Many Areas Requiring Standards

To support the synthetic biology workflow:

1. Assembly
2. Design
3. Distributed Repositories
4. Laboratory parts management
5. Simulation/Analysis

The Immediate Need

Take any current publication on a synthetic circuit and try to reproduce it, let me know how you get on.

Practical Aims of the Standardization Effort

Specifically:

- To allow researches to **electronically exchange** designs with round-tripping.
- To send and receive designs to and from **bio-fabrication centers**.
- To allow **storage** of designs in repositories.
- To embed designs in **publications**.

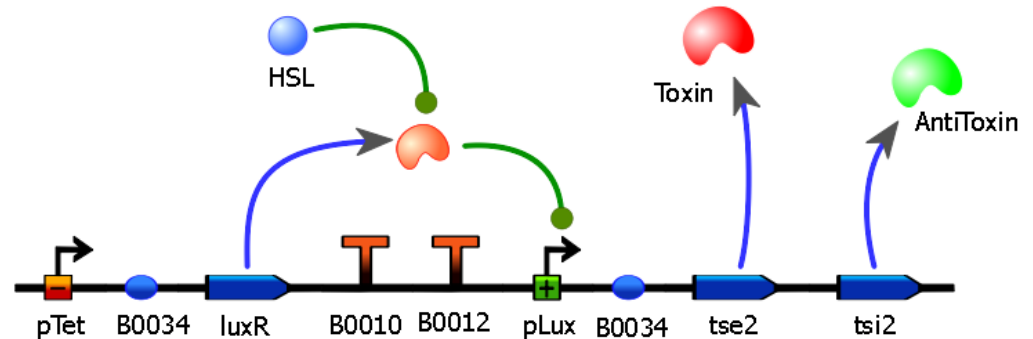

Synthetic Biology Efforts

International Leadership Team

Mike Galdzicki

Some History

The synthetic biology standardization effort was started with a grant from Microsoft in 2008. The first meeting was held in Seattle.

The first draft proposal was called PoBoL but was since renamed to **SBOL – Systems Biology Open Language**

Since then the community has managed to organize two meetings a year . The project however has until now been largely unfunded.

This summer we were awarded (Sauro, Gennari and Myers) a 4 year NSF grant to support SBOL development by the community.

Synthetic Biology Open Language (SBOL) – 1.1

Current Status of Standard 1.1

- libSBOL 1.1 available at: <http://www.sbolstandard.org>
- Validation service at Newcastle
- Java and C/C++ Libraries, including Python bindings
- Import/Export: GenBank, RDF/XML, JSON (in dev)
- Supported by a growing list of tools (academic and industry)
- Mandated by DARPA
- Part of the European Strategic Plan in Synthetic Biology

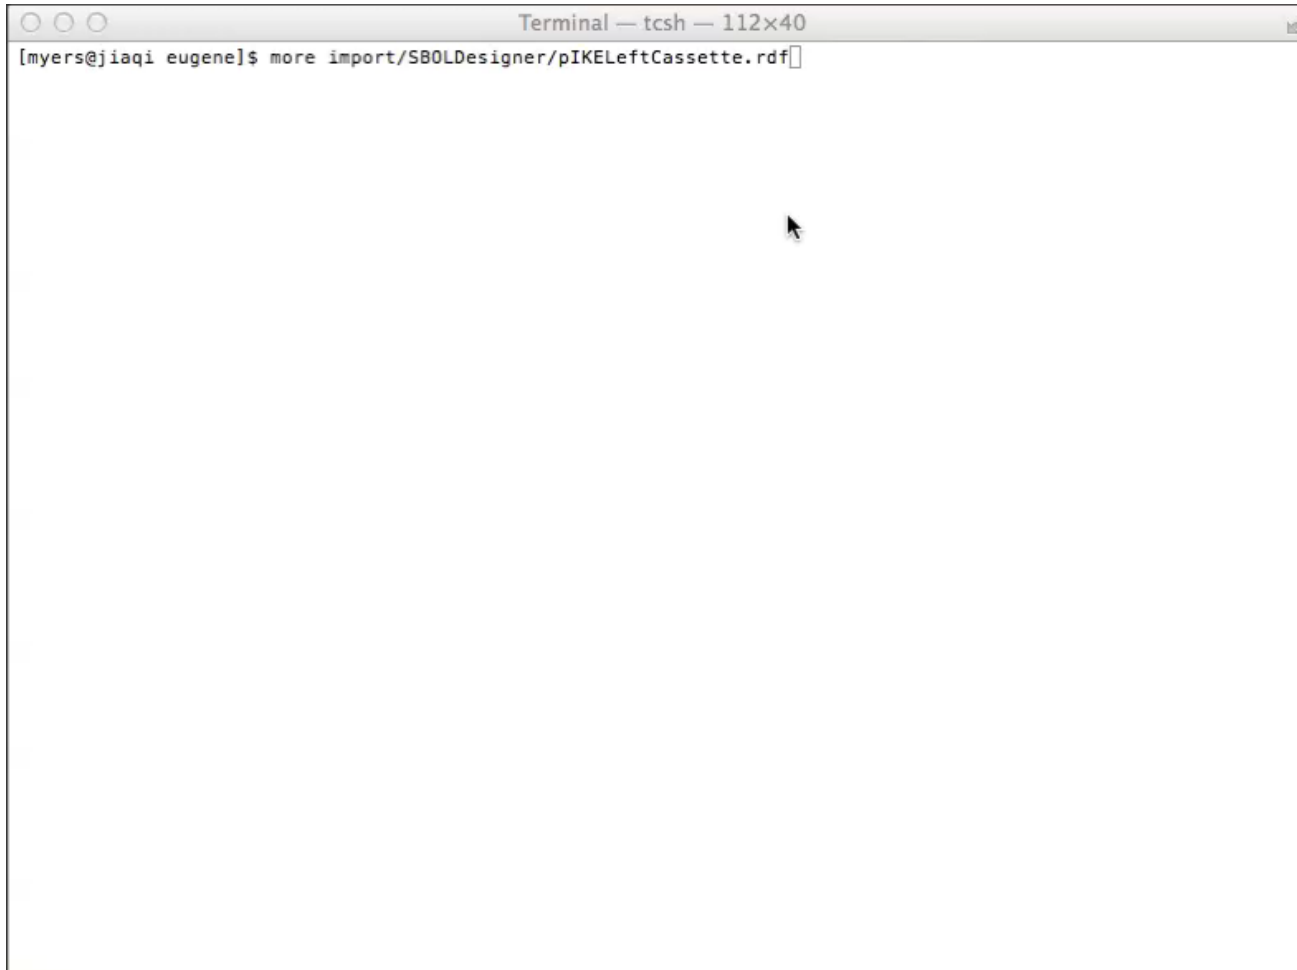

Demonstration (1.1) NBT Paper

SBOL Designer

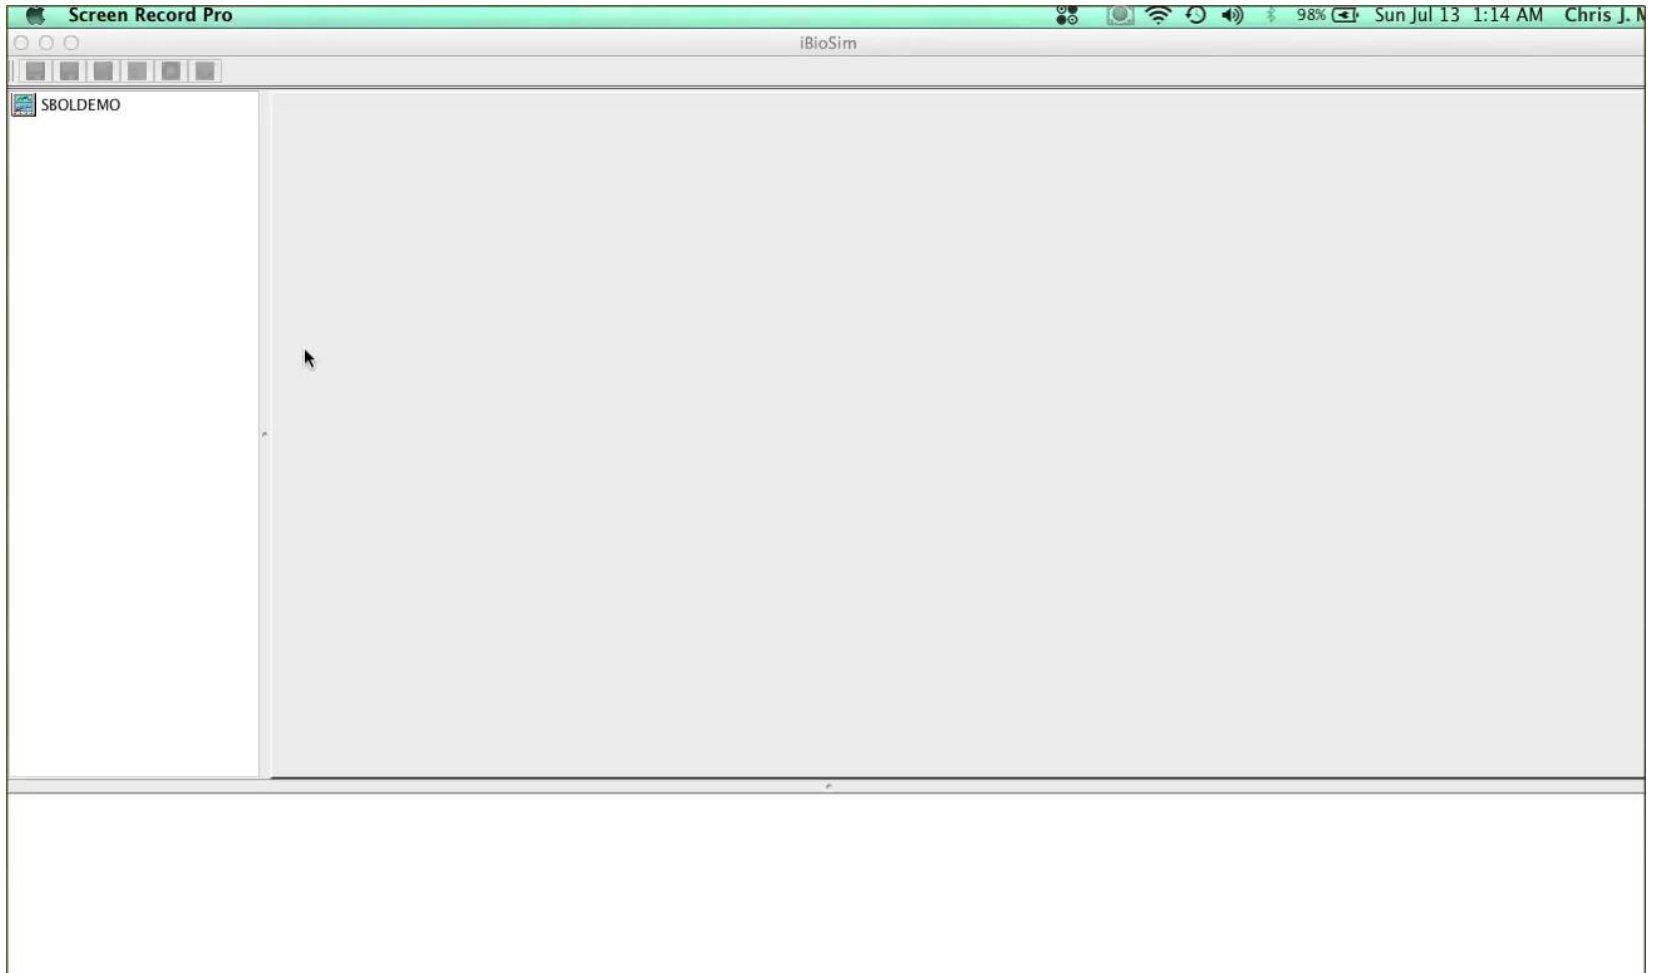

Eugene

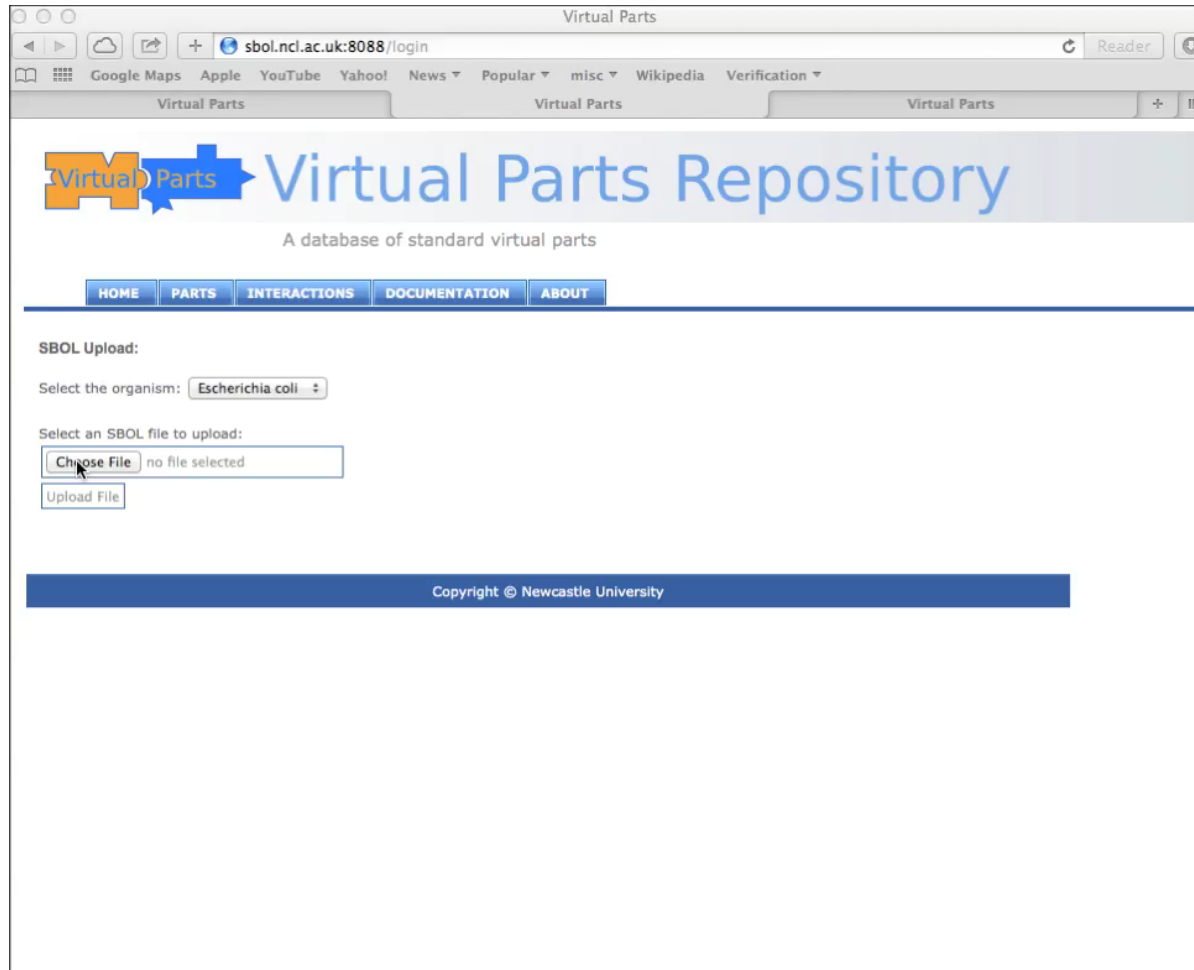

```
Terminal — tcsh — 112x40
[myers@jiaqi eugene]$ more import/SBOLDesigner/pIKELeftCassette.rdf
```

A terminal window titled "Terminal — tcsh — 112x40" with three window control buttons in the top-left corner. The prompt is "[myers@jiaqi eugene]\$". The command "more import/SBOLDesigner/pIKELeftCassette.rdf" has been entered, and the cursor is at the end of the line. A mouse cursor is visible in the center of the terminal area.

Synthetic Biology Open Language (SBOL) – 1.1

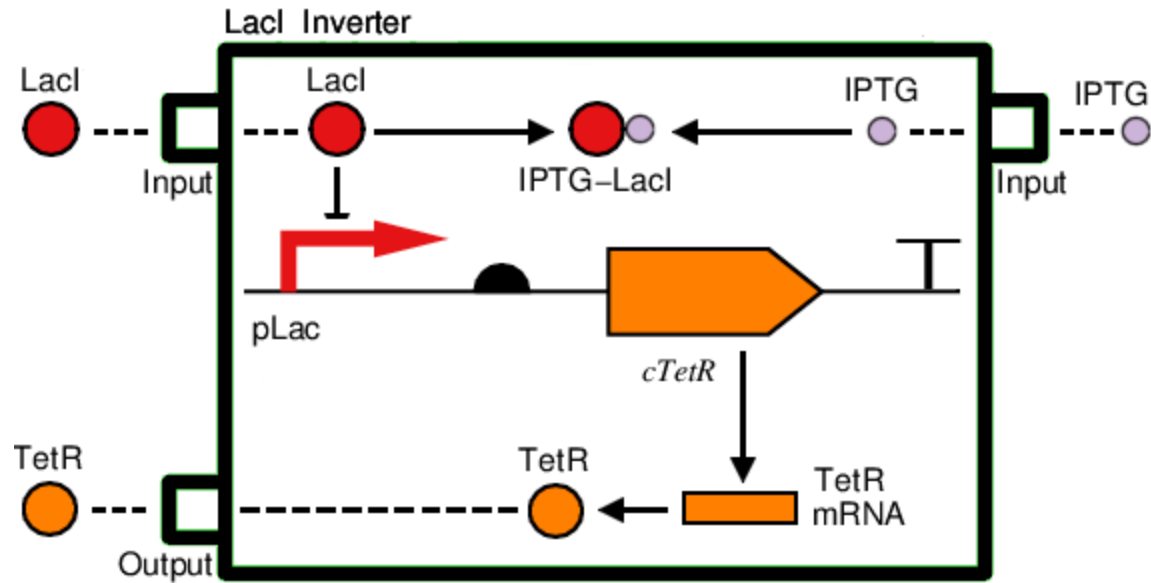

Synthetic Biology Open Language (SBOL) – 2.0

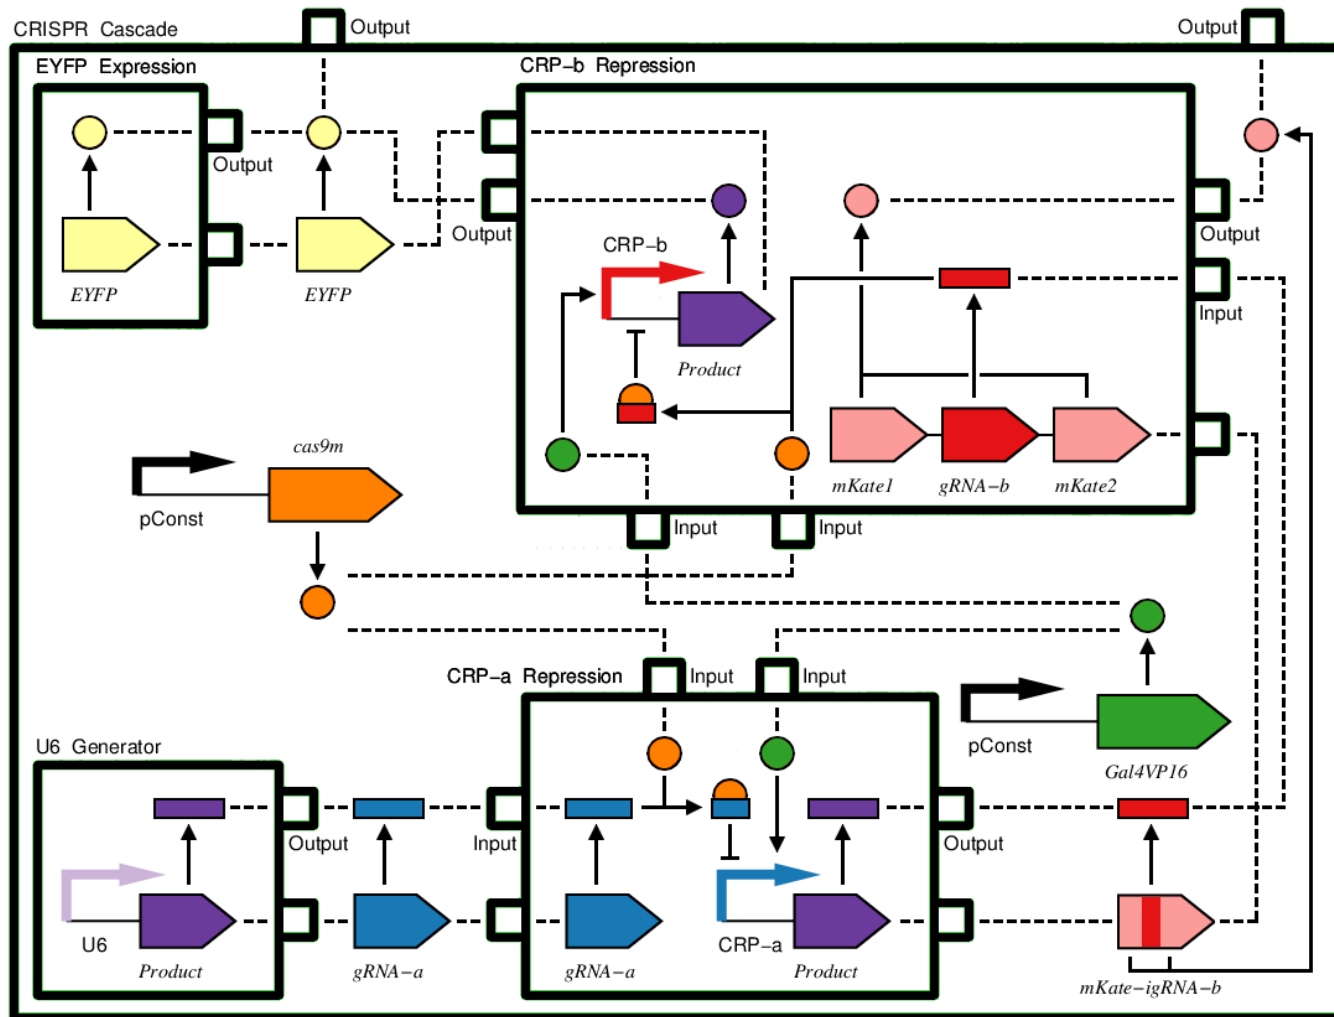

Use Case

IPTG	LacI	TetR (Out)
0	0	1
0	1	0
1	0	1
1	1	1

Use Case: More Complex Example

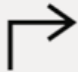

Current Status of 2.0

- Spec has been roughed out, most issues resolved
 - Will be discussed on Wednesday breakout
- Support libraries are being updated with test implements planned at Utah, Washington and Newcastle.
 - Will be discussed on Wednesday breakout
- Exploits SBML for representing computational models
- SBOL Visual also being updated for 2.0

SBOL Visual (SBOLv) – Agreed in 2013

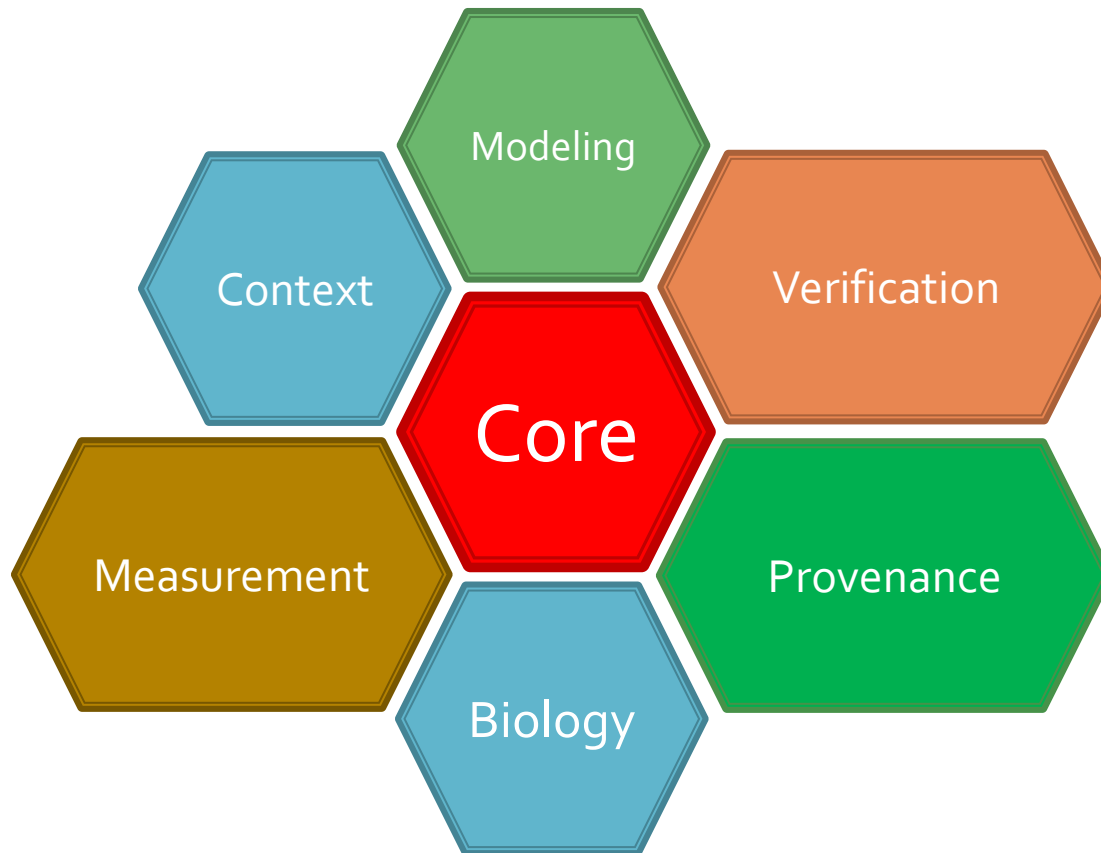

Originally developed at the Berkeley BIOFAB (Endy, Jacqueline Quinn et al).

A means to annotate
DNA

 promoter	 origin of replication
 cds	 primer binding site
 ribosome entry site	 blunt restriction site
 terminator	 sticky restriction site
 operator	 5' overhang
 insulator	 3' overhang
 ribonuclease site	 assembly scar
 rna stability element	 signature
 protease site	 user defined
 protein stability element	

Software and Standards Development:

SBOL is too big to be developed by one group

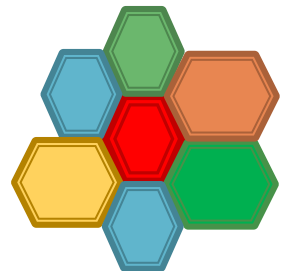

Software and Standards Development:

SBOL is too big to be developed by one group.

Supporting software libraries and the exchange formats have to easily extensible.

The burden on tool developers must be minimized.

We must engage with the engineers who make stuff.

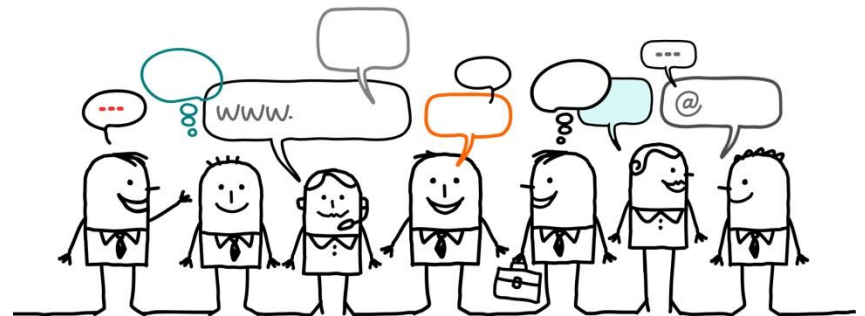

Future Efforts

- Test Suite
- Bringing more experimentalists into the conversation
- Explore use of SBGN/BioPAX

SBOL Breakout Sessions

- **Tuesday**: Breakouts Tuesday afternoon
- **Wednesday**: Main Session in the morning
- **Wednesday**: Breakouts in the afternoon
- **Friday**: Breakouts afternoon
